Safe Play for Soft Play

• Any activity involving motion, rotation or height may cause serious accidental injuries resulting in paralysis or even death.

• Make sure it is properly positioned before use.

• Each system has printed warning labels. Become familiar with these warnings and instruct all users of the dangers as well as proper play techniques.

• When in use, keep soft-play products in an open and visible area. Make sure all hard surfaces of the play area are covered with padding and that there is qualified supervision at all times.

• Keep equipment dry except when cleaning.

• For general cleaning, use a mild soap and water mix-

ture applied with a damp cloth. When possible, use a disinfectant which is safe for children such as BioSilver.

DISINFECTANT, FUNGICIDE & VIRUCIDE

Like it or not, we live in a global community which facilitates the transmission of SARS, Avian Flu, Herpes, HIV, Influenza, Staph, Pseudomonas, Salmonella, and other common bacteria, virus, and fungus which threaten our health and well being. It is clear that a new technology disinfectant is now required to stay ahead of the spread of these pathogens. BioSilver is this product, a revolutionary new disinfectant EPA registered and based on patented Silver Ion Technology. Please contact UCS to purchase.

The background features a large, stylized, sketch-like figure of a person in a grey and blue patterned outfit. In the foreground, a man in a black shirt is assisting a woman in an orange shirt with a backbend on a red and blue UCS mat. To the right, a man in a white shirt is spotting a young boy in a red shirt performing a handstand on a blue UCS mat. The scene is set against a light blue sky with white clouds.
